

RENO QRP GROUP SLOW SPEED CW QRP NET REPORT

Hi all

Attached is the log of our last slow speed NET May 11, 2023

The NET was held from Hidden Valley the weather was sunny calm temp about 60F. NET started on time at 10:00 am on 7.045 MHZ. The noise level was S2.5 SFI 170 A index 26 K index 1 Xray C1.6

There were 3 check ins Mike WA6ARA, Phil AB7WE, and Woody K1LB. I heard another signal that was very weak but on my second call nothing. Also there was a signal about 559 but his sending was unreadable. Bob KA6NSN, sent e-mail to me that he listened in but had no copy.

Mike was first up his signal was solid using his KX3 at 10 watts into his 80 MTR Doublet, the weather at his QTH Ridgecrest, CA was a very fine day.

Phil did a great job reporting from his home in NW Reno, He was using his IC7300 at 10 watts into his inverted "L" Phil, gave RST report for Mike at 559 and had no copy on Woody, that is very strange.

Woody was last to give his report He had copy with Mike and Phil. Woody was home today using his fine rig the TS 890 at 10 watts. His antenna is the EFHW I missed how high the antenna was. He ended with the weather report a fine day with temp at 65 F.

The NET was closed at 10:37 AM.

Hope conditions are better next time.

The next NET will be May 25, 2023, starting at 10:00 AM

Hope to hear you all again. 73/72 Ed/WD7Y

RENO QRP GROUP SLOW SPEED CW QRP NET REPORT

Hi all

Attached is the log of our last slow speed NET May 25, 2023

The NET was held form Hidden Valley the weather was sunny calm temp about 60F. NET started on time at 10:00 am on 7.045 MHZ. The noise level was S3 SFI 164 A index 12 K index 3 Xray C1.6

There were 6 check ins Mike WA6ARA, Woody K1LB, Roy W7HJL, and at last call Ray W7TAP. Kirk KB7QOB and Rob KA6JLT were I/O.

Conditions were poor and I had pileups on calls I thought that Van W7IEX and Derek W7DLZ called in only because I copied one or two letter, I was wrong because they didn't answer when I called on them. So this means that there were some others that wanted to check in, I might have heard 3 to 4 others out there.

Bob KA6NSN, sent e-mail to me that he listened in but had no copy on any one of his 3 antennas.

Mike was first up his signal was solid using his KX3 at 10 watts into his 80 MTR Doublet, the weather at his QTH Ridgecrest, CA the weather was very nice clear es no wind temp at 70. Mike also reported all signals way down.

Woody was next to give his report was home today using his fine rig the TS 890 at 10 watts. His antenna is the EFHW at 33 ft as a inverted "L" He reported the weather was a spring day temp was 65 F.

Roy from Walla Walla WA he was using his K3 at 15 watts into his long wire, usually he uses his vertical. Roy reported conditions poor today. His RST was 569 and my RST was 549.

At last call Ray W7TAP checked in but had nothing to send when I called on him.

At last comments Mike noted that conditions had gotten worst Woody and me had RST at 329.

The NET was closed at 10:42 AM.

Hope conditions are better next time.

The next NET will be June 8, 2023, starting at 10:00 AM

One last thing is a reminder to all new commers to the NET.

After you call me listen to when I call QNS after that I send the calls that are checked in. If you don't hear your call send it again when I call CQ. You may need to do that 3, or 4 times. I call CQ until I don't hear any more calls.

Hope to hear you all again. 73/72 Ed/WD7Y
