

RENO QRP GROUP SLOW SPEED CW QRP NET REPORT

Hi all

Attached is the log of our last slow speed NET August 3, 2023

The NET was held from Hidden Valley the weather was sunny air calm getting hot.

NET started on time at 10:00 am on 7.045 MHZ. The noise level at set up was S3 SFI 175 A index 12 K index 2 Xray C2.3

There was a total of 6 QNI today Mike WA6ARA, Roy W7HJL, Woody K1LB, Dave KI7SJE, Derek W7DLZ, Joe KM6HJP.

First up was Mike from Ridgecrest, CA using his KX3 at 10 watts into his 80 MTR Doublet he was solid copy at 599. Mike gave good report.

Next was Roy from Walla Walla, WA the band then sounded very noisy his signal was 569 to me but he had a hard time copy on me saying signa; is weak and QSB. Roy did give a good report.

Then was Woody's turn he was operating a POTA Park K4391 using his IC 7300 at only 10 watts he was solid copy. (e-mail to me from Woody. "Actually, K4391 is Humboldt-Toiyabe National Forest (HTNF), and the spot I was in is off Mt Rose Highway in the Steamboat Hills area. It's only a few miles from my house, so quick to get to.")

Dave from Wall Walla, WA was up next his signal was much stronger than Roy's at 579. Dave was using his KX3 at ten watts into his doublet. Very happy Dave is QNI more frequently these days.

Derek from Lemmon Valley north of Reno was next, Derek gave RST reports for all QNI using his Yaesu FT DX at 10 watts into his EFHW up 20 ft.

Last was Joe from Doyle, CA he had very hard copy on me at 229, but he hung in there and gave a report using his IC 7300 at ten watts into a EFHW inverted L 40 ft up he also gave a weather report.

The next NET will be August 24, 2023, starting at 10:00 AM

Hope to hear you all again. 73/72 Ed/WD7Y

RENO QRP GROUP SLOW SPEED CW QRP NET REPORT

Hi all

Attached is the log of our last slow speed NET August 24, 2023

The NET was held from Hidden Valley the weather was sunny air calm Very nice day. NET started on time at 10:00 am on 7.045 MHZ. The noise level at set up was S2.5 SFI 147A index 4 K index 1 Xray B9.3

There was a total of 5 QNI today Woody K1LB, Rob KA6JLT, Dave KI7SJE, Bob KA6NSN, and Paul N6ILJ.

First up was Woody at home in Reno using his TS 890 at 10 watts into his EFHW inverted "L" Woody gave RST for me and Rob along with the weather.

Next was Rob from his home in Reno he was using his IC 761 at 10 watts into his random wire on the ceiling, Rob has a fine signal from his indoor antenna. Rob reported that Woody was 579 at his location.

At that time there were only two QNI so it was time for last call.

Dave called and gave his report from Walla Walls, WA his signal to me was 569

He was using a Doublet 30 ft high with his KX# at 10 watts. Dave was solid copy.

Next to report was Bob from Quincy, CA he was very strong at 599 he reported that the weather there was clear with a temp of 70F he was using his FT 757 at 10 watts into his COBRA ant up only 20 ft.

There was one more very weak signal out there but when called he did not respond.

After the NET I called N6ILJ with my call WD7Y and he responded. Paul from Redlands, CA was very weak and so was I he reported that my RST was 229.

His report was deep QSB but he made the role call for the NET, Thanks Paul for the effort.

The next NET will be Sept. 7, 2023, starting at 10:00 AM

Hope to hear you all again. 73/72 Ed/WD7Y
